RADIATION PROTECTION

APPLICATION :

Workers in the Medical professions who are exposed to ionizing radiation from X-ray and fluoroscopy need to be certain they are being properly protected. The long term harmful effects of x-ray radiation on the human body is well known, therefore every precaution and consideration must be taken and perhaps the most important decision is what protective garment to select.

TRUST

- Light and comfortable for ease of wearing for long durations
- Wrap around protection : .5mm Pb Eq
- All Time popular design

EFFICIENCY

- Weight is distributed evenly around hips.
- Hook & loop closure with 1" safety buckle.
- All day comfort for the Lower Body

Disposable Lead Gloves

To Protect Hands from constantly being exposed to scattered radiation and occasionally exposed to the direct X-ray beam need proper protection.
